**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/587,430	<b>Applicant(s)</b> BARGHEER ET AL.	
	<b>Examiner</b> Peter R. Brown	<b>Art Unit</b> 3636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 January 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

Claims 17-23 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 25, 2008.

Claims 14-16 and 24-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14, in reciting the "covering", fails to set forth any connection or attachment between the covering and the other structural elements, in a manner to clearly and positively define the invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Hoeppler (DE 10046216).

Figure 1 appears to show structure as claimed, including a fan 11 in air duct opening 9, "heating element" 4, and shield 7.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be

patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14,16 and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Mertens or Bogisch et al in view of Arold (DE 19949935).

Both Mertens (fig. 2) and Bogisch et al (figs. 6,7) show the use of headrests that have rear shield members associated therewith for various reasons. The patent to Arold (fig. 1) teaches the conventionality of utilizing a heating device within a headrest, which includes a duct, and air inlet opening with a grid 21, a heating element and fan, and an outlet opening arranged on a downward side of the headrest. In view of this suggestion, to have provided the headrests of Mertens or Bogisch et al with such a heating device, for adding to the comfort of the occupant, would have been an obvious modification to one with ordinary skill in the art.

Note that the mesh shown in figure 7 of Bogisch et al would have elastic properties, and the specific location of the intake opening is considered a matter of design choice.

Claim 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hellig, Saito et al, Lee, Bargheer et al show various features of the invention.
